Greenhouse Gas Management Policy

Akkie Prakarn Public Company Limited is aware of climate change, which is a change that affects all sectors. The company has therefore monitored the amount of greenhouse gas emissions from the organization's activities according to the guidelines set by the Greenhouse Gas Management Organization, starting from 2017 to the present, in order to use the information to consider determining guidelines and policies for reducing greenhouse gas emissions, as follows:

- 1) Set greenhouse gas management as part of the Company's strategic plan to enhance sustainable organizational growth.
- 2) Commit to reducing greenhouse gases in line with the 5-year management plan (2023-2027) by setting a target to reduce greenhouse gas emissions by 2 percent from the base year (2019).
- 3) Improve and develop operational efficiency and energy efficiency to reduce greenhouse gas emissions in operations.
- 4) Study the technological approaches to carbon capture, utilization and sequestration, including carbon offset activities that are appropriate for the Company.
- 5) Provide knowledge about greenhouse gases and create awareness among employees and the Company.
- 6) Monitor and assess risks related to achieving greenhouse gas management goals and determine guidelines for managing those risks.
